**Subject:** Gold King Mine ER - EPA Data Request

Shelly,

It appears that the people handling the domestic drinking water testing program are needing to track parcel ID number in addition to other data for those participating in the well testing program. If I correctly understood our conversation yesterday, then the tribal lands don't really have a typical ownership parcel system but one of allotments, leases, etc... If there is a unique land identifier that the tribal lands use, then perhaps if it were added to the list of addresses you have within 1.5 miles of the river, it could prove useful to the well testing program. Please let me know if this list is something that can be shared.

Thanks,

**John Wieber**
